

Enterprise-Wide Cyber & Tech Insurance Solutions for Small-to-Medium Businesses

[in]tegral provides innovative, enterprise-wide cyber and technology solutions for small-to-medium sized businesses. We engage with our Insureds to identify how a potential cyber event could affect their operations and work to understand the financial implications of such an event. EmergIn Risk then aligns an insurance offering with our Insureds' strategies to offset these unforeseen performance interruptions. As part of our tailored underwriting process, EmergIn Risk identifies potential cyber events that could affect an applicant's operations and the financial implications of such an event. EmergIn Risk's insurance offering is aligned to the applicant's strategies that offset these unforeseen performance interruptions.

The modern company is often heavily reliant on technology to deliver services to their Insureds. EmergIn's 3rd party proposition can also be extended to provide professional liability to cutting edge technology firms as well as other miscellaneous E&O exposed companies whose operations are technologically centric.

EmergIn Risk has a broad appetite, offering customized solutions to companies of different sizes, industries and geographies.
